TECHNICAL SKILLS

JavaScript   React   Redux   Axios   Vue.js   AngularJS   Electron

Node.js   Express   MySQL   Sqlite3   Knex   HTML5/CSS3

SOFTWARE ENGINEERING APPLICATIONS

Campfire | http://www.campfireonline.net

Web application which allows users to collaboratively write stories.
- Built character-limited entry field for story contribution
- Implemented login system with Express Sessions, stored user data in MySQL database
- Integrated Knex and Axios to handle communication with Express server

dataset.tools | http://dataset.tools

Desktop app for managing datasets on data.world, a data sharing website.
- Interfaced with data.world API via OAuth2.0 to download and upload user datasets
- Implemented Redux to streamline management of application state
- Utilized Material UI components to create a functional and appealing user interface
- Applied Electron to package the application for native desktop use
